Hi all: this small meeting is based on a research proposal that was submitted earlier this year and includes collaborators outside of WEBDATANET as well. Because some collaborators will be in Mannheim we had the idea to hold this meeting and at least do the following:

1. collect signatures on the proposal to avoid some of the mailing needed

2. talk about options and needs for the immediate future (preliminary work before we hear about the success or failure of the proposal)
3. gather support for an STSM that is related to this research

We could also begin visioning at what conferences we could meet if the proposal is granted and bring in ideas re people, resources, and follow-up research that can be linked to our proposal.

Hello,

Is the group still active?

If so, I'll be happy to read more about your goals and activity.

Thanks,

Ela Oren.
